S.C.A. Information and Communication Technology
CREED

S.C.A. students will take responsibility for values and beliefs about what knowledge is and how to live and work in an information rich technological environment.

S.C.A. students will be aware of how knowledge is built, how it is used and what it demands of them as students and citizens.

S.C.A. students will commit to the appropriate use of technology and all published or unpublished materials available in our global society.

S.C.A. students will be responsible to locate, evaluate, and collect information from a variety of sources.

S.C.A. students will be aware of the ethical privilege and significance of access to intellectual property of all types and will give credit to authorship through the use of citations, attributions and references.

S.C.A. students will take responsibility to comply with the rights and requirements of the statute of fair use and practice ethical access to intellectual property in our society. The S.C.A. community will take appropriate measures when necessary to acquire legal access through the payment of copyright fees or royalties or by holding a license for particular types of performances in various formats.
